

Convention Shaker 2018

a 20 months Odyssey

by Susanna & Harald

The *Odyssey* starts...

...with selecting the artist

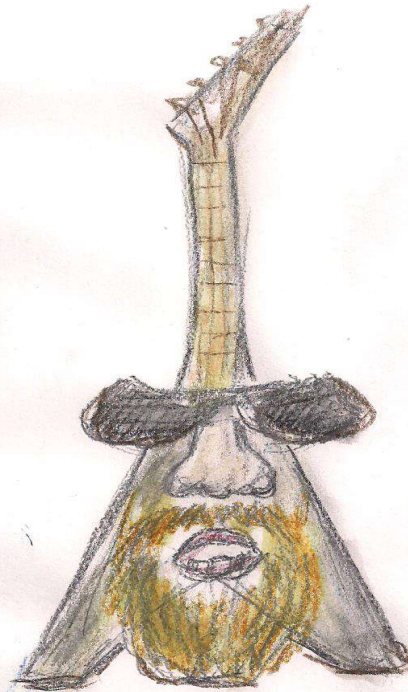

We asked two German artists to send
their shaker set idea for the theme

Shakers Rock

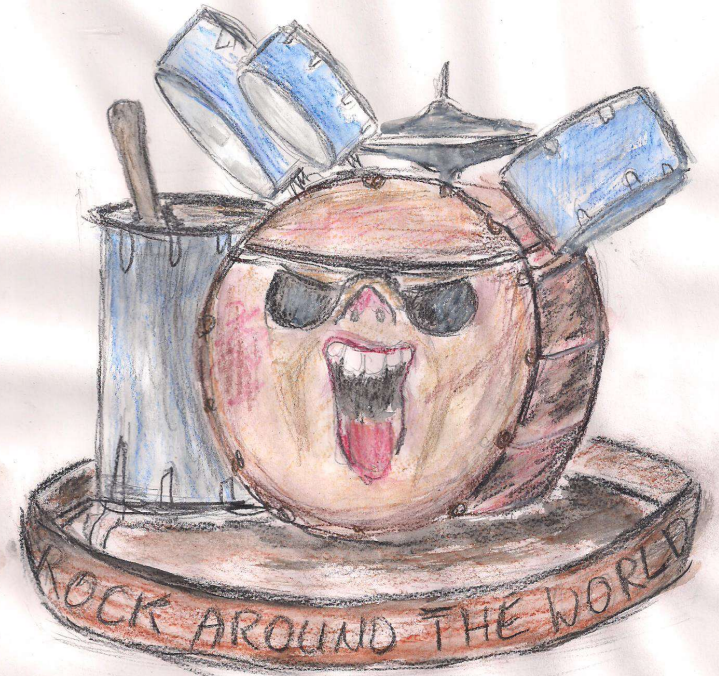

First we received this design

The decision was easy...

The making of the set was
not...

For example: the hair

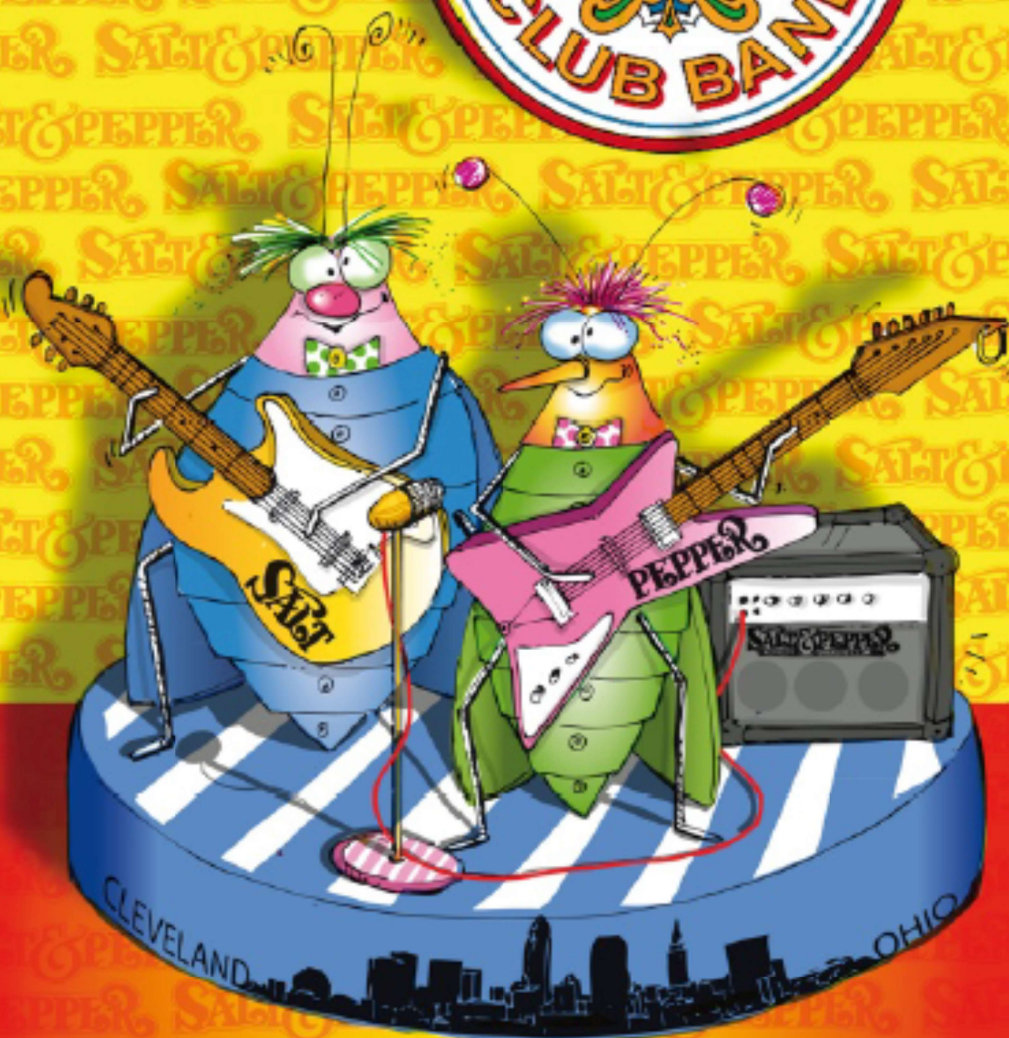

The total number of pieces
Thomas Adam needed to
build all 150 sets is:

7650

This includes 2100 pieces of printed
elements (14 per set)

Excluding the printed
elements, each set is made
of 37 individual pieces.

The color of the #2 set is made of real platinum, not silver.

This makes the #2 set more valuable than the #1 set.

The set you will get still consists of 9 pieces which have to be assembled the right way.

And finally: end of March 2018.

Everything was ready and we visited Thomas at his home close to Berlin for a final check of all sets.
